

## Recognition Systems

# HandPunch® 3000

## Biometric Time & Attendance Terminal

### Put your hands on the accurate, affordable solution.

Ingersoll Rand Recognition Systems now brings the accuracy and convenience of biometric technology easily within reach of any time and attendance applications. In operations that range from coal mines to clean rooms, Ingersoll Rand Recognition Systems have proven themselves to be a practical and precise solution. Our terminals are so affordable, it doesn't make sense to consider any other technology.

#### Smarter than card-based terminals

There are no cards to create, administer, carry – or lose. The HandPunch® 3000 verifies employees' identities in less than one second, based on the unique size and shape of their hands. HandPunch 3000 clearly notifies each user of a match using red and green indicator lights. Because no one can punch in or out for your employees, the system reduces time theft and improves payroll accuracy.

#### Versatile and programmable

Beyond a simple time clock, the HandPunch 3000 provides definable data management keys that allow data collection when employees punch. The readers transmit data to the time and attendance host PC through a variety of methods including direct wiring, modem and Ethernet. The HandPunch 3000 also has the ability to control a door. When you want to cut time and attendance costs...do it by hand.

#### FEATURES & BENEFITS

- Saves money over card-based systems
- Eliminates Badges
- Eliminates Buddy Punching
- Fast and easy to use
- Provides the most accurate time and attendance solution available
